

One15

Any pro-monitoring setup could benefit from Amphion One15s. These high-end passive monitors employ custom-designed drivers, a high-density Corian waveguide, and a sealed enclosure with a passive radiator to deliver the natural, transparent, un-hyped sound. Every tool a sound engineer or producer uses, either helps to make the final product better or allows working quicker. But with the One15 studio monitors, you can do both. Make better decisions faster no matter if you are composing, tracking or mixing.
