

Amp100 mono

Amazingly compact in size and weight - about 450 grams (one pound) each, excluding the cabling - Amp100 mono blocks are technically and sonically identical to the Amp100 in every way, delivering the same world-class performance as its bigger two-channel brother. Amp100 mono was designed for use with mobile rigs, or in compact workspaces, where space is at a premium.

Technical specifications

Mono amplifier 100W
